

We understand what is needed to make your ride the safest it can be.

Whether you want a GM or Ford chassis in gas or diesel, or you prefer our NexBus™ Hybrid electric powered bus, or you need to transport 1 to 7 wheelchair passengers, we have the bus for you.

Our Special Needs units offer unsurpassed options:

- 403/404 Compliant wheelchair lifts
- Flat floor design for up to 7 wheelchair positions
- Track seating for flexible seat plans
- 76.5" High headroom, highest in the industry, for ease in loading and unloading
- Your choice of bench, CRS (child restraint seats), 3-point lap and shoulder belt seats.
- Child check security system - so no one is left behind
- White exterior roof and AC systems to help cool the bus in summer months

COLLINS BUS CORPORATION

Safe & Flexible Seating Options

Collins Bus Corporation manufactures a complete line of school bus certified seating options that provide a padded compartment around occupants with energy-absorbing seat backs.

The DuraStraint™ Child Restraint Seat features a versatile integrated child seat which converts the standard seat to accommodate children from 20-50 pounds.

The DuraStraint™ 3-Point Harness Seat accommodates children weighing over 40 pounds and incorporates lap and shoulder belts.

The standard Collins school bus bench seats are built with strong steel seat frames which form an integrated structure between floor, seat, and wall. All our seats fit in the same bolt pattern so that additional holes in the floor are not required. In addition, they utilize the same foot print, making them interchangeable and retrofitable to any floor plan.

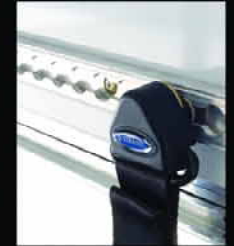

Wheelchair Passenger Options

Collins Bus offers wheelchair lifts from the leading manufacturers, and a variety of options for wheelchair tie-down systems.

Collins Bus offers full floor track and seat track options that allow complete flexibility in establishing wheelchair positions. This track system allows for adding or deleting wheelchair positions as necessary.

Storage containers are available to accommodate tie down and occupant restraint systems.

Other Features & Options

Full view entrance door and transition panel provides added visibility.

Integrated rear AC maximizes headroom.

The optional security systems ensure that all passengers dismount the bus upon completion of the route.
